Reasons for allowance

The following is an examiner's statement of reasons for allowance:

The prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitation of the dependent claims, in such manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claims (41, 51, 61, 71, 81, 91, 101 and 128) which include the method of forming an active matrix type display device including the steps of forming an organic leveling film over said semiconductor film after the patterning of the semiconductor film to provide a leveled upper surface and before forming an

opening having a tapered configuration so that a diameter thereof is larger at an upper portion than at a lower portion of the opening and wherein the upper portion of the opening is rounded from a first point on said upper leveled surface of the leveling film to a second point inside the opening adjacent the upper opening and then forming a pixel electrode in the opening.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
